

Everyone is satisfied with their synthetic turf when it is installed. *But, what about year 5 and beyond?* Shawgrass's 450+ONE certification ensures the quality you expect and deserve to extend the life of your installation without sacrificing performance and aesthetics.

AMERICAN-OWNED & MADE IN THE USA

ALL TURF THAT WE MANUFACTURE UNDERGOES A **MINIMUM OF 450 QUALITY & PERFORMANCE TESTS** TO ENSURE YOU ARE GETTING A WORLD-CLASS LANDSCAPE OR RECREATIONAL SURFACE

ALL QUALITY TESTS ARE DONE BY **FULL-TIME EMPLOYEES OF SHAW INDUSTRIES GROUP, INC.**

ALL MANUFACTURING IS DONE IN FACILITIES **WHOLLY OWNED AND STAFFED BY EMPLOYEES OF SHAW INDUSTRIES GROUP, INC.**

+ONE REPRESENTS OUR ASSOCIATES GOING ABOVE-AND-BEYOND THE REQUISITE TESTING TO MAKE SURE YOU ARE COMPLETELY SATISFIED

shawgrass®

THE science BEHIND shawgrass®

Shawgrass products are developed through extensive research in our world class research and development laboratory. The development of our products takes place under the guidance of the same dedicated group of reaches who develop world-class playing surfaces for Shaw Sports Turf.

Our team works in the largest and most dynamic research laboratory dedicated to synthetic turf in the world.

With testing protocols and procedures that exceed those of even the most stringent independent labs, the Research and Development Center at Shawgrass is at the forefront of advancement of the most aesthetically pleasing and best-performing turf systems in the world.

The 75,000 square-foot research and development center is the largest and most expansive in the industry. The facility houses a “pilot” experimental manufacturing plant with narrow-width versions of the machines used in our manufacturing facilities. These machines give our R&D team the ability to run initial trials like no one else in the industry can. The equipment in the pilot plant is dedicated to tufting, twisting, texturizing, air entangling, coating and yarn development.

The R&D team also has access to a large turf performance lab featuring all the necessary equipment to test factors ranging from wear and abrasion to effects of weather.

As a result of this commitment to research and development, Shawgrass products are considered the best the industry has to offer and gives customers peace-of-mind in knowing their products are state-of-the-art.
